KeeBar Products and Services

Self-Adhesive Labels & Non-Adhesive Tags

Custom manufactured self-adhesive labels and tags in a variety of materials, styles, sizes, & shapes for a wide range of applications. These include, but not limited to, thermal transfer, blank, printed, tinted, border and banded in rolls or fan folded. Our labels and tags are used in a

variety of industries ranging from warehousing to pharmaceutical/ health care.

Styles of labels and tags come either on rolls, fan folded, or sheeted. A wide variety of special slits and perforations can be provided on either the face of the label or the back of the liner, or both.

Materials from simple single-layer paper stocks, such as thermal transfer, direct thermal, EDP and gloss, to custom piggybacks. We also produce many Polyester, Kimdura, Retro Reflective and other film-based labels, which can be removable or permanent with a super aggressive adhesive as required. Also provide labels with almost any patterned adhesive. Tag stocks are available in 7 & 10 pt. paper or lumber tag and other material can be provided.

Sizes are available up to 10" wide x 20" long in most configurations, including laser sheets of 8 ½ x 11, 8 ½ x 12, 8 ½ x 14 and custom sizes. **Colors** are available in a range of blank to multi-color lay-outs.

Imprinting Services

We imprint labels and tags - yours or ours. We affix labels (either ours or yours) to a wide variety of products. **Modulus /Consecutive Numbering**, as well as Data Base numbering.

Imprinting methods: Thermal Transfer, Direct Thermal and Laser depending based upon need.

Bar Codes: All popular codes are available in either fixed or variable formats. We imprint industry - specific formats such as Logmars, GSA, HIBC, AIAG, EIA, and UPC. We use Code 39, Code 128, Interleaved 2 of 5, Codabar, Plessey, Code 93 and all versions of UPC including versions A, E, & EAN.
